

TRUCK SUSPENSION

**SERVICE
BULLETIN**

AD Series

Equalizer Beam

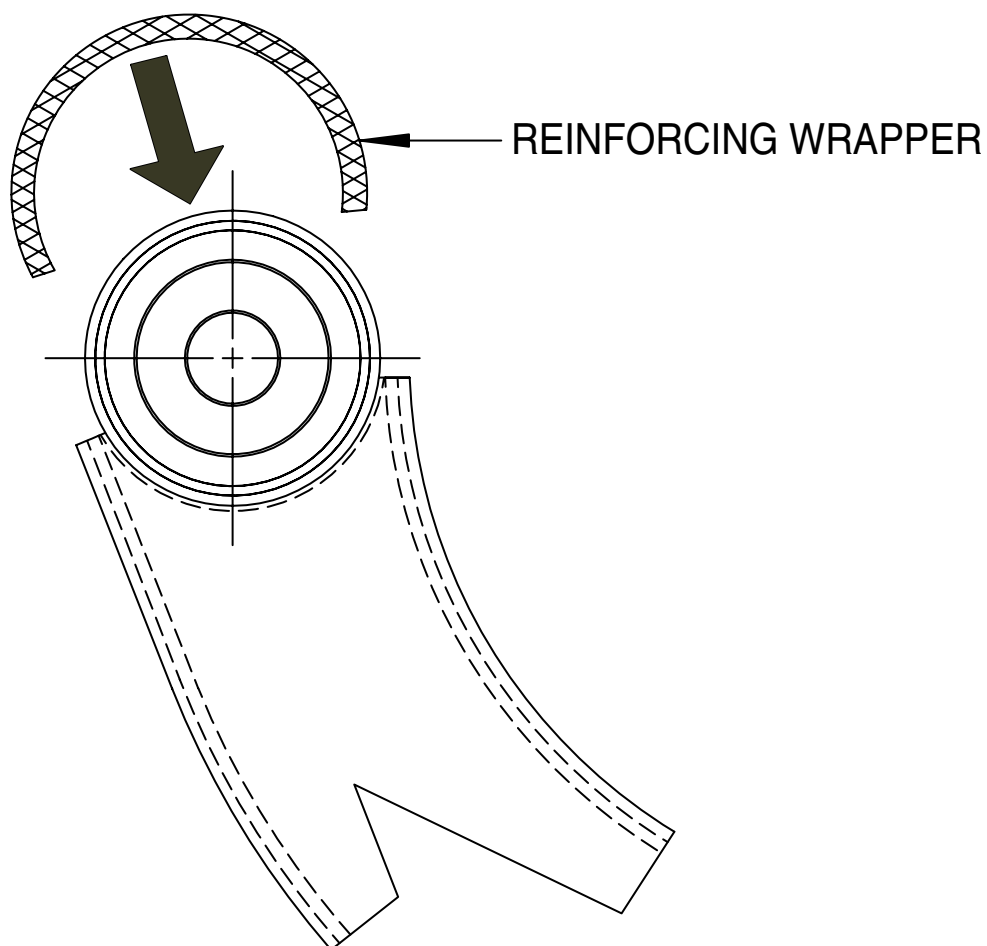

30 September 2004

Effective immediately, all equalizer beams fitted to "AD SERIES" suspension will be supplied with a reinforcing wrapper fitted to the pivot eye of the beam. This applies to both new suspension kits and spare parts.

This change is to give greater durability of the beam when operating in extreme conditions.

Part numbers for beams will not change as only the upgraded beam will be available. Should an equalizer beam be replaced in the field, only the upgraded beam should be fitted

The upgraded beam can be easily identified as shown below.

GO THE DISTANCE.
