

## SAF® Tire Pilot Plus™ (TPP)

### Production Location Change to Haldex de Monterrey, Mexico (HDX)

**Effective Date:** August 28, 2023

**Attention:**

SAF-HOLLAND® will be moving all SAF® Tire Pilot Plus™ (TPP) production to Haldex de Monterrey, Mexico (HDX) facility to support our strategic product and production alignment with the Haldex organization which was purchased by SAF-HOLLAND, Inc. earlier this year. This move will occur in a transitional process from its current production location of Nashville, TN to Monterrey (HDX) during the summer to ensure a smooth transition for all customers and suppliers.

This move will not impact current pricing and/or delivery schedules as planned and will be as seamless as possible to our customer base. Notifications to all suppliers have already taken place.

This move further aligns the TPP product line and production to our Haldex de Monterrey, Mexico facility which has been making Haldex air products for 20 years by consolidating these products into one facility.

If you have any questions or require additional product assistance, please contact your account manager or customer service representative at 800.876.3929.
