

## SAF® Drum Brake Trailer Axles

### Product Change Notification: SAF® Drum Brake Trailer Axles Will be Equipped with Haldex Brand Brake Shoes

Effective: February, 2024

#### Attention

SAF-Holland is optimizing its brake shoe offering on all new SAF® drum brake trailer axles. Beginning February 5, 2024, all drum braked axles (shoes only) and dressed drum brake wheel end packages (SAF® SC5 and SC7) will include the Haldex brake shoes. This change will be for both brake sizes, 16-1/2" x 7" and 16-1/2" x 8-5/8", and for both axle brake ratings, 20,000 lb. and 23,000 lb. The Haldex brake shoe utilizes an advanced Grey Rock friction material and superior coating to improve corrosion resistance and braking performance.

The Haldex brake shoes not only conform to all NHSTA FMVSS 121 testing requirements, but also meet the highest quality performance standards in the industry. This change will be seen on all SAF trailer suspension models that are specified with drum braked axles (shoes only) or dressed drum brake wheel end packages (SAF® SC5 and SC7).

This change will not degrade braking performance, product warranty or installation as the brake shoes are interchangeable with the current brake shoes. Fit, form and function are not affected.

If you have any question or require additional product assistance, please contact your account manager or SAF-HOLLAND Customer Service at 800.237.8932
