

Series launch of the new trailer disc brake SAF SBS 2219 K1 from May 2024

SAF-HOLLAND is to launch a new 22.5" disc brake in the 9t axle range, developed in close cooperation with Knorr-Bremse and it will be available from the 2nd quarter of 2024.

The **SBS 2219 K1** is scheduled to replace the SBS 2220 K0 by the end of 2025.

- Weight saving 5 kg per Axle (15 kg per trio) compared with the SBS 2220 K0 with BI9 brake disc (BI9-22S01)
- Copper-free brake pads (< 0,5% Cu)
- Innovative pad retention system – secures the correct assembly of the inner and outer brake pads.

Data of the new disc brakes SBS 2219 K0 und SBS 2219 K1:

Characteristic	SBS 2219 K1
Dimensions brake disc	Ø 430 x 45
Maximum axle load	9 t for full trailers 10 t for semi- and center-axle-trailers
Test load homologation	10,2 t
Maximum braking torque	19 kNm
Maximum permissible input force	10,2 kN
Deadweight of the caliper with brake pads	29,5 kg
SAF part number left	03 080 0127 20
SAF part number right	03 080 0128 20
Test report number	TDB0892
