

SAF Drum Brake and P89 Disc Brake Axles with Axle Spindle Nuts Supplied

Product Change Notification

Effective January 2, 2019

Attention

SAF-HOLLAND is implementing a product change to axle spindle nut offerings for SAF branded drum brake and P89 disc brake axles. The current 3-piece nut assembly, and the optional ProTorq® axle nut system, will be replaced by the ZipTorq® axle nut system. This change applies to all axle assemblies from SAF-HOLLAND where the axle nut is supplied. The only exception is for the P89 Plus disc brake, which will continue to be supplied with the ProTorq® nut system.

Effective January 2, 2019, the standard offering 3-piece assembly, and the optional ProTorq® axle nut system, will no longer be available as a production order item for SAF drum brake and P89 disc brake axles.

If you have any questions or require additional product assistance, please contact your account manager or customer service representative.
