

## Weight optimisation through design change to SAF INTRA steel hanger bracket series

In the course of continuous product improvement, SAF-HOLLAND has now optimised the design of the SAF INTRA steel hanger bracket series. The changeover is continuous and is currently being implemented for all heights of hanger bracket. It will be introduced in the 3rd quarter of 2015.

### Features of the new steel hanger bracket series:

- Lower weight - for a 3-axle trailer, weight is reduced by up to 3 kg.
- The same rigidity and length of service life, but reduced weight.
- A more homogeneous surface - fewer edges in painting and coating processes.
- No change to assembly used up to now.

Overall height	Design up to now	Order no. up to now	New design	New order number
