

SAF® Trailer Air Ride Suspensions

Production Change Notification: SAF® Trailer Air Ride Suspensions Will Be Equipped with Haldex Brand Height Control Valves (HCVs)

Effective: March 2024

Attention

To better align with customer request, SAF-HOLLAND is implementing a product change to its standard height control valve (HCV) offering on new fixed and sliding SAF® trailer air ride suspensions. Beginning March 2024, SAF® air ride suspensions that are specified with HCVs will be supplied with the Haldex PR Plus HCV.

Haldex PR Plus HCV is interchangeable with the current HCV, and will not affect fit, form, and function.

If you have any question or require additional product assistance, please contact your account manager or SAF-HOLLAND Customer Service at 800.237.8932.
